

Smart Rehabilitation 3.0 Project

2019-1-ES01-KA203-065657

C8 - Short-term joint staff training in Technological innovation and adaptive reuse of historic buildings

From 6-10 June 2022
UCY, Nicosia, Cyprus

The partners will exchange knowledge and experiences, learning from each other, and debate about how to develop training methodologies and tools on specific topics concerning the technological innovation in heritage buildings restoration. These topics are considered necessary for future "Building Rehabilitation Experts".

The aim of the event is to agree on a common pattern to be applied to training programs for "Building Rehabilitation Experts" in the partner Countries. At the same time partners from the different countries will check their own state of the art on the comparative research, orientating and focusing it to the issues emerged during the discussions.

The participants will be selected as experts able to give elements for the debate for the development of intellectual outputs, as extensive research activity carried out between the **University of Cyprus - Department of Architecture** experts.
